Ruekert/Mielke Questionnaire

What are your areas of expertise?

Ruekert/Mielke has had the pleasure of serving over 150 communities in Wisconsin and northern Illinois. We work together with communities to provide technically sound, cost effective, innovative solutions to the wide variety of engineering, financial and planning challenges facing municipalities. Our consistent commitment to excellence has earned our firm a reputation for unequaled customer service. We have studied, designed, managed and implemented a wide array of municipal projects. This includes sewer, water, wastewater, and storm water management systems, transportation, GIS web applications and hosting services, survey and construction administration. Our emphasis is developing technically sound project solutions that also consider the long-term consequences of the project. Communities rely on us, and we are proud of the 65 years we have spent building relationships with them.

What are your limitations?

Ruekert/Mielke works only for municipalities, school districts and non-profits. We do not allow our priorities – serving our municipal clients – to become clouded by indebtedness to a developer for the promise of future development work in another community. We make sure that this infrastructure will stand the test of time, thereby assuring lasting value and service to our clients. Ruekert/Mielke puts this promise in writing, in the form of a signed “Statement of No Conflict of Interest.”

What are your geographical service areas?

We serve the state of Wisconsin, particularly the southeastern portion, and northern Illinois. We have offices in Waukesha, Kenosha and Madison.

What type of partnerships have you developed?

Ruekert/Mielke has partnered with architectural firms to complete surveys, site plans, on-site storm water management plans, and parking lot designs for a wide variety of facilities. Our knowledge of municipal specifications and codes is extremely helpful in projects such as this.

Are you licensed and/or bonded?

Our firm is a licensed professional engineering firm in the states of Wisconsin, Illinois and Minnesota.
What type of training credentials have your employees received?

Ruekert/Mielke currently employs 24 licensed professional engineers (P.E.), 3 engineers in training (E.I.T.) and 2 LEED AP professionals.

What is your mission/passion for your respective business?

Ruekert/Mielke's mission is to understand and respond to our client's individual needs with timely, cost-effective engineering solutions. Our goal is to achieve long-term relationships with clients through the tradition of personalized service, while continually improving our expertise and effectively utilizing the latest technological advancements. Most municipal projects involve not just the task at hand, but the long-range implications of following a particular approach. We anticipate the future, making sure that today's project doesn't become tomorrow's problem.

Do you have any trade affiliations or memberships?

Ruekert/Mielke is a member of the American Council of Engineering Companies, the Society of Professional Engineers, the American Society of Civil Engineers, The Master Builders Association and the United State Green Building Council.
